

Reacting Isn't Enough

Student data is a target for attackers. School and district tech teams can't keep up.

Designed for smaller school districts, ActZero Managed Detection & Response (MDR) service provides a powerful full-stack cybersecurity solution at a fair price. We wrapped enterprise-grade technology and AI with our expert threat hunters into a service with 24/7 protection across endpoints, network, mobile devices, cloud, identity, and email accounts.

We bring all the technology and people to your team so you can leave the defense to us.

Loss of learning following a cyberattack ranged from 3 days to 3 weeks, and recovery time ranged from 2 to 9 months.*

Cybersecurity is the number one priority for school system technology administrators. **

Why ActZero

Secure Your School or District Better

Our patent-pending AI enables us to identify and actively respond to threats faster, taking action at machine speed on your behalf.

Cybersecurity Made Simple

We automate most of the manual tasks and filter out false positives and reduce noise, escalating only critical alerts, to improve efficiency and lower costs.

Deliver Expertise to You

In addition to daily threat hunting and hygiene recommendations, our 24x7x365 SOC triages and investigates alerts for you. We offer access to our customer experience team for when you need it most.

Leave the Defense to Us.

Security Coverage from A to Z

ActZero brings:

CrowdStrike or **MS Defender** EDR & NGAV
Zimperium Mobile Threat Defense
Stellar Cyber XDR
Tenable Vuln. Management
AWS & Elastic
ActZero "Sixth Sense" A.I.

ActZero Connects & Protects:

Cloud

Azure
AWS
Salesforce

Network

All major firewalls

Email Accounts

Office; Microsoft 365
GMail; Google Workspace

Identity

Okta

Active Response on Your Behalf

- 24/7 SOC and support
- Security Information and Event Management (SIEM)
- Daily threat hunting
- Real-time alerting
- Auto-block, active response, and managed remediation
- Incident response retainer
- On-demand dedicated security advisor
